# ABB drives for HVACR

## Effortless connectivity for building automation

All ABB HVACR drives, including the unique ultra-low harmonic variant, have BTL-certified BACnet MS/TP as standard and BACnet/IP as an option, enabling effortless connectivity with major building automation and control systems. Different buildings may have different fieldbuses, and we have multiple options to satisfy your needs. To discover more, visit <https://new.abb.com/drives/segments/hvac>

## Size. Weight. Choices.

Everything counts.

Choices. A smaller, lighter motor that gives you the same output, or an IE4 high efficiency motor without having to change your machine design? A drive with the built-in flexibility to help you simplify your machines or one to just help save more energy? Everything counts, and that's why the choice is yours with our synchronous reluctance (SynRM) motor and drive packages. [www.abb.com/motors&generators](http://www.abb.com/motors&generators)

## **ABB Ability™ Smart Sensor** Motors that let you know when it's time for a service.

ABB's new condition monitoring solution revolutionizes maintenance for low voltage motors. ABB Ability™ Smart Sensor monitors key parameters and sends the data to a secure server for analysis. Users can access detailed status reports from their smartphone or PC. The solution enables proper maintenance planning for longer motor lifetimes, lower energy consumption and big reductions in downtime.
